Report: Nvidia's board is preparing to oust Jensen Huang

A Wall Street Journal report that Nvidia's board is preparing to remove Huang sent the stock down about 8% after hours, says @GavinSBaker, who argues the board should finish its independent investigation first, or put any earlier move to a shareholder vote. By early Thursday @KobeissiLetter reported the stock had climbed about 6% off its low, still roughly 5% under Wednesday's close, as traders pared bets on a firing. @naval: "one does not just simply replace the founder." X @GavinSBaker · X @KobeissiLetter · X @naval

Nebius Q3: $981M revenue, and prepayments now cover more than the capex

Nebius reported Q3 revenue of about $981 million against roughly $908 million expected, per @KevInvestingYT and @EndicottInvests. @demian_ai's recap of the release: customers committed more than $12 billion since the start of the quarter, prepayments covered over 100% of the capex behind Q3 deals (50-60% three months earlier), GPU-hour prices rose 22% on average from Q2, and Databricks, Datadog and Snowflake signed for the first time. @EndicottInvests reports 2027 capex guidance of $40-45 billion, at least $18.5 billion of it expected from prepayments. X @demian_ai · X @EndicottInvests · X @KevInvestingYT

Jukan: Nvidia's Rubin slips again, volume shipments now 2027

Following a Taiwan rumor that Nvidia had cut orders, @jukan05 says he has confirmed that Rubin has been delayed again, this time by motherboard warpage (the HBM issue was resolved in October), pushing volume shipments to 2027; Nvidia has raised Blackwell orders in the meantime. A source told him a widely shared claim of 30% CCL order cuts was false. X @jukan05

Tesla Robotaxi now runs 24/7 in every city it serves

Tesla's @robotaxi account says the service now runs around the clock in all of its cities, which @elonmusk put as "168 hours a week." Until now only Austin had defined operating hours, notes @TSLAFanMtl, who reads the move as a sign of confidence in FSD and less human supervision; the next thing to watch is fleet growth in each city. X @elonmusk · X @TSLAFanMtl

Ex-Tesla President Jon McNeill reveals he and Elon Musk copied how Sheryl Sandberg and Mark Zuckerberg ran their partnership

“Sheryl Sandberg introduced us. So both of us quizzed Sheryl on, how do you and Mark manage your relationship?”

“And she said, okay. We meet once a week religiously for at least an hour. We open with, here are things you’ve done that have pissed me off, frustrated me, disappointed me, whatever. You clear that stuff first. And then you get to, oh, let’s talk about the business strategy.” …

S **Serenity** @aleabitoreddit · Nov 12

I disagree, Jensen Huang is practically irreplaceable from $NVDA.

And it's like if you took out Elon from $TSLA, the valuation and confidence in the company would collapse.

The foresight to bet on CUDA before AI took off, build the Neocloud ecosystem...

The move to secure critical supply chain capacity years ahead of demand, and sell rack-scale systems (with CPUs, networking, etc).

Turn the ASIC threat into another opportunity by investing in $MRVL, MediaTek, to compete against $AVGO. Bringing them all into Nvidia's NVLink ecosystem... …

x.com/aleabitoreddit/status/2120798356205093139

J **Jukan** @jukan05 · Nov 12

The rumor is a bit more specific. After lunch, word started circulating in Taiwan that NVIDIA had cut its order volume by 30%, and AI-related stocks sold off across the board, from CCL and PCB makers to foundries. I think the 30% figure makes no sense. This looks like FUD to me, but I’ll dig into it.

x.com/jukan05/status/2120760526427091199

NC **Nic Cruz Patane** @niccruzpatane · Nov 11

I just completed 1,005 miles non-stop in 15 hours in my Model 3 on @Tesla FSD!

I'm officially halfway to Starbase, TX for Starship Flight 15. Tomorrow, another 1,000 miles.

Back-to-back days driving non-stop for 15+ hours. Thank you, FSD! https://t.co/qoBDJeLv5f

P **Paradis** @ParadisLabs · Nov 12

The Nvidia board removing Jensen Huang would be like the NBA banning Michael Jordan over his gambling in 1993.

If the NBA had banned MJ before investigating, it would have lost its driving force just as the game was going global. Jensen is that same force for AI.

By all means investigate, but you simply cannot remove a talismanic player on headlines alone!

PM **Paul Millerd** @p_millerd · Nov 11

I think sometimes people think I reject goals. I do not

I've had specific goals in the past. For example, get a green card for Angie. There was a very specific objective, and there are no alternative ways to get there paperwork wise

I mostly became self-employed because I never was inspired by goals, and the more I connected with my body, it never seemed like they made a difference whether I believed in them or cared about them …

SemiAnalysis @SemiAnalysis_ · Nov 11

BREAKING NEWS: Less than 3 weeks since the MiniMax M3.1 Flash launch, NVIDIA and @Inferact have already submitted an initial vLLM Rubin NVL72 submission that is state-of-the-art and delivers 6.5x better perf per TCO than GB300 NVL72.

Great to see that Rubin is already becoming more and more mature and integrated in partnership with @vllm_project!

This Rubin submission uses the new locality-aware MoE feature in CUDA 13.4, which reduces latency and increases realized HBM bandwidth by ~1.2x.

INVESTMENTS

Daniel Koss @daniel_koss · Nov 12

Who decides Jensen Huang's fate at $NVDA?

X is full of strong opinions. Let's look at the facts.
Then I'll share what I believe is currently happening behind the scenes.

There are 11 directors on the board.
Jensen is the only one who isn't independent.

Removing him takes a simple majority for the decision: 6 votes.

Nvidia has no chair. Lead independent director Stephen Neal (77, a white-collar defense lawyer) runs the process.

The 10 independent directors (number in bracket represents an estimate how much money they made from NVDIA stock).

The founding loyalists:
1) Mark Stevens (since 1993, ~$7.5B): Sequoia partner when it backed Nvidia in 1993. Sold ~$1.4B of stock this year.
2) Tench Coxe (1993, ~$5.9B): Sutter Hill co-led Nvidia's first $2M round.
3) Harvey Jones (1993, ~$1.6B): advised Jensen in the earliest days.
4) Brooke Seawell (1997, ~$0.6B): has chaired the audit committee for decades.

Jensen made them ~$15.6B. They've known Jensen for 30+ years.

The swing votes:
5) Stephen Neal (2019, ~$38M): his old firm Cooley has been Nvidia's outside counsel since 1993, but he's a career white-collar investigator.
6) Dawn Hudson (2013, ~$162M): chairs the committee that sets Jensen's pay.
7) Aarti Shah (2020, ~$12M): her son works at Nvidia.

The independents:
8) John Dabiri (2020, ~$6M): Caltech academic.
9) Melissa Lora (2023, ~$3M): has never sold a share.
10) Suzanne Nora Johnson (July 2026, ~$0): joined from Goldman Sachs.

Ousting Jensen needs all 3 independents AND all 3 swing votes, or at least 1 founding loyalist turning on him.

The board is reportedly "preparing to oust" him. If that's true, someone from the old guard may already have flipped.

My personal view:

The board knows full well it is clearly in Nvidia's economic interest to keep Jensen for as long as they can.

Jensen is Nvidia. He is their vision, their heart, their foundation. And he personally owns many of their most important relationships.

I think they will do everything in their power to keep him in the CEO role, within the laws and rules they are bound by.

Their key task will be to find plausible deniability for keeping him, without violating any rules or laws themselves.

Their incentive to keep him is 100% clear to me. The

question is whether they can justify it without putting themselves at risk of neglecting their legal or board duties.
x.com/daniel_koss/status/2120785013704687767

Ben Bajarin @BenBajarin · Nov 11

If it comes to it I believe Ian Buck will be appointed as CEO possibly as interim until the investigation runs its course or if they want to look for outside candidates.

I've spent a good amount of time with Ian the last few years and he is more than capable and deep in the business.

Joe Hudson's 7 operating rules

Codie Sanchez @Codie_Sanchez

From a conversation with Joe Hudson, who coaches leaders at OpenAI, Anthropic, Google and Apple: kill 1:1s and bring problems to the whole team, rotate who runs recurring meetings, let anyone stop a bad meeting, and have every employee run five experiments a quarter on their own job. He also says to ask for pushback rather than sell an idea, build the part you understand least first, and end every email with a named owner, action and deadline.

POST · SEP 22

The money is not in the robot

Ren @ren_stocks

A layer-by-layer map of the humanoid supply chain: brains, sensors, edge inference, motors, joints, hands, actuators, power electronics and rare-earth magnets. Ren's argument, backed by a Goldman scorecard, is that the bottleneck and the margin sit in the mechatronics in the middle, especially strain-wave gears and roller screws, rather than in the robot makers or the brain.

5 A fixed charge for a privilege or for professional services (3)

RIDDLE

What has a neck but no head?

End of today's paper.

Covering roughly Nov 11–12, 2026. Compiled Thursday morning, ET. Links are in the web edition.

ANSWERS

MENTAL MATH

1. **120** 20 × 6 = 20 × 6 + 0 × 6 = 120
2. **156** 10% is 24, so 65% = 6 × 24 + half of 24 = 156
3. **about 1 m** 20 × 500 = 10,000 sheets × 0.1 mm = 1,000 mm = 1 m

MINI CROSSWORD

■	1 S	2 E	3 C	■
4 S	C	A	R	5 F
6 A	R	G	U	E
7 P	U	L	S	E
■	8 B	E	T	■

FOUR CARDS

Turn Drinking beer and Age 16. Drinking beer could hide something that breaks the rule; Age 16 breaks it if the other side turns out to be Drinking beer. Age 40 can't break it (the rule never says only those cards have it), and Drinking soda isn't covered by the rule at all. Most people pick the card that matches the rule's second half instead of the one that could falsify it. Most people get this version right and the letters-and-numbers version wrong, though the logic is identical.

RIDDLE

A bottle.
